

COUNCIL QUESTIONS & ANSWERS

Meeting date: August 10th

1. Is the additional funding required for the Puckett's Gulch Stair Rehabilitation project eligible for funding from the Investing in Canada Infrastructure Program (ICIP)?

All projects are subject to the Federal/Territorial Bilateral Infrastructure Agreements and as such, no projects will be approved retroactively. We have already started this project after Council's vote last Monday. Therefore, this project would not be eligible. The Yukon Government is in the process of amending the current Bilateral Agreement with their federal counterparts and anticipate they will have this completed by this fall. We will continue to work with YG to see what 2021 and 2022 projects will fit into this new ICIP stream. Council will view these projects during the upcoming budget cycle. This is not any new funding that will be added to ICIP, only new funding stream classifications that will add greater flexibility for the territory.
