

	Stakeholder comment	Was input included in Draft Plan?			Planner comments
		Yes	No	N/A	
Key-informant interviews (Nov - Dec 2015)					
External interviews: what's working?					
City planning, engagement and management	Some feeling the city is doing a good job on engagement in recent years			x	Thank you! We are trying and using the International Association for Public Participation as a guide
	Some feel a multi-use trail policy is inclusive and maximizes stewardship of trails; segregated trails a recipe for conflict	x			As per City Trail Plan
	City allows low-impact commercial activities in park	x			As per Regional Parks Plan and Community Economic Development Strategy
	The City is a great partner to work with	x			Thank you! The City appreciates and acknowledges the role of partner organizations in improving the Parks values
Natural features	Cantlie Lake: great summer and winter destination			x	We know Cantlie Lake is an important destination. While outside the Park, the City will continue to allow access along the Cantlie Lake Road
	Yukon Energy Hill, at the north end of Schwatka Lake, is good winter paragliding area	x			The area is within the Park boundary
	Lots of wildlife in the park – lynx, mule deer, caribou and bears so close to urban centre	x			Protecting wildlife is a key value of this Park and plan
	City open to new ideas, such as fat-bike snow packing pilot on the Magnusson Trails			x	Trail Plan allows for new ideas to be vetted by Trails and Greenways Committee
Trails & trailheads	Livingstone trail for snowmobiling			x	We know Livingstone Trail is important residents, especially snowmobilers. Access will remain open
	Lakeshore trails – amazing trail network	x			Great! These areas are within the Park boundary
	Multiple trailheads: Magnusson, Tower / El-Camino, Chadburn Ski Trails, summit, across from YG Education Building, Long Lake, behind the hospital, Pee-Wee hill	x			As per Trail Plan
Facilities & programming	Has Rifle & Pistol Club close to city			x	Rifle and Pistol Club within Park boundary and has separate and pre-existing agreement with the City
	Yukon Conservation Society guided Canyon tours	x			City is grateful to the service YCS provides to Park visitors
	Lakes good for commercial non-motorized boating operators (e.g.: stand-up paddle board lessons)	x			As per Regional Parks Plan and Community Economic Development Strategy
Importance to Whitehorse	Chadburn is a highly valued asset to residents and tourists	x			As per Regional Parks Plan
External interviews: what could be improved?					
Communication	Trail communication generally, seldom proactive or easy to access, poor maps	x			Plan outlines some tangible steps to improve communication
	Trails: still lacking clarity on where motorized forms of recreation are and are not permitted to travel	x		x	Plan seeks to improve communication. Motorized recreation directed by Trail Plan. Will work with Trails and Greenways Committee to improve communication.
	City did not communicate the identification of these parks in the 2010 OCP. These parks are not known	x		x	We heard this a lot and are hopeful this planning process and future communication activities will increase resident awareness of this and other Regional Parks
Engagement, resources, & expertise	Some feeling the city is pandering to the loudest voices			x	We believe we designed a comprehensive and inclusive process and would be happy to rationalize our approach
	Engagement processes need to be more inclusive – some have young kids, evening meetings a challenge	x			Due to this comment, we hired the Boys and Girls Club to provide free child-minding for participants at the Ideas Fair in February. The City will continue to strive and host inclusive public engagement events
	City has minimal budget for implementation			x	Planners have considered budget realities in developing this Plan to ensure it is implementable
	Concern the city does not have a comprehensive recreational, environmental, and heritage inventory therefore, how can you plan if you don't know what you have	x			City mitigated this early comment by producing a comprehensive Background Report available online.
Trail planning	City does not have ecological expertise			x	Planning team included a consultant biologist who curated existing ecological studies
	Out and away MMU trails don't lead anywhere			x	Plan is consistent with Trail Plan and MMU trail work conducted by Trails and Greenways Committee
	Motorized recreationists' concerned over-restrictions on where they can ride			x	Plan is consistent with Trail Plan and MMU trail work conducted by Trails and Greenways Committee
	Concern snowmobiles are free to go almost anywhere, which leads to damage and noise (bylaw is too vague and does not consider different snow levels / times of year)	x		x	Plan is consistent with City's existing Snowmobile Bylaw and Parks and Parks and Public Open Space Bylaw
	Concern that multi-use policy is exclusive because those seeking a quiet non-motorized experience can't get it because there are no non-motorized only trails	x		x	Plan considers single-use trail designation where multi-use adversely impacts cultural and /or ecological resources and/or compromises user safety. Plan consistent with Trail Plan which supports multi-use trail development.
	Trail braiding along Grey Mtn. Ridge, erosion	x			Plan includes initiative to improve the Grey Mountain Summit trail
	Trail planning and decision making process vague, ad hoc, and not well communicated			x	Trail Planning follows Trail Plan and guided by Trails and Greenways Committee
	Trails and Greenway Committee: it's a sad statement when certain meetings need to go in camera			x	Trails and Greenways Committee process established through city policies and procedures
	Ensure trail development is done to a high standard especially if volunteers			x	Trail development guided by Trails and Greenways Committee and implemented by City trails crews and recreation organizations such as Contagious Mountain Bike Club using best practices
Enforcement	Motorboats used in lakes even though not permitted; needs greater enforcement	x		x	Plan abides by Parks and Public Open Space Bylaw which regulates motorboat use in Park lakes
	Long Lake is a big party area			x	Plan abides by City bylaws which are complaint-driven
	People drive too fast on roads	x		x	Plan abides by City bylaws which are complaint-driven; RCMP regulates motor-vehicle use on City roads
	Lots of dog droppings on shorelines, especially Long Lake	x			Plan includes initiative to develop dog-owners education program and materials to promote responsible dog walking in sensitive ecosystems and wildlife areas, including shorelines
External interviews: ideas and opportunities?					
Enhanced experience	A management plan is an opportunity to further protect and enhance trail network			x	We agree; this management planning exercise is guided by the Regional Parks Plan
	Any kind of infrastructure that enhances the user experience to the maximum number of people in the least environmentally impactful way	x			Infrastructure is a critical aspect of how people experience the park. The Plan heavily considers infrastructure design and maintenance that considers recreational, ecological, and heritage values, and is consistent with the multi-use principles set-out in the Trail Plan and Parks and Recreation Plan
	Wilderness camping experience (not a drive-in) to allow people to stay longer and explore more	x			The Plan recommends the provision of remote access wilderness camping opportunities to enhance visitor experience
	Clear some shoreline for more dedicated beach area	x			Plan includes initiative to improve Chadburn Lake day use area including an expanded beach area
Interpretation	Greater interpretation and education	x			Plan includes multiple initiatives to improve education and interpretation opportunities as per Regional Parks Plan
	YCS would be interested in doing more interpretive walks if more capacity			x	City is grateful to the service YCS provides to Park visitors
	Develop an observatory and other viewing areas to take in night sky	x			The Plan supports the development of an observatory as led by a third-party
	Miles Canyon & Canyon City	x			YCS and tourism-operators provide interpretive walks in these areas, both of which are within the Park boundary. KDFN is the lead government behind any future interpretive planning and Canyon City; City and YG to support
Trails	Hospital Hill: proximity to hospital and health walks liked marked and marketed loop	x			Plan includes initiative to improve trail signage and wayfinding
	Enhanced fat-biking infrastructure	x		x	Park Plan identifies management area types to guide Trails and Greenways Committee interpret Trail Plan and therefore new trail and trail-related infrastructure development
	More trailheads & more signage – identify trail loops	x			Plan includes initiative to improve trail signage and wayfinding
	Opportunity to connect Chadburn trails with hospital and downtown (especially with a pedestrian bridge)			x	Not within scope of Plan, however City is aware of bridge idea and all trail connectivity is considered b the Trails and Greenways Committee

	Grey Mountain Ridge trail & full Yukon River trail (whole city)	x		x	Plan includes initiative to improve the Grey Mountain Summit trail; Yukon River trail exists within the Park, outside boundaries should be considered by Trails and Greenways Committee as per Trail Plan
	Connect Summit to 'Mother Tucker'	x			Plan includes initiative to improve the Grey Mountain Summit trail and connect to Mother Tucker trail
Stewardship	Schools: Chadburn is in their backyard	x			Plan includes partnerships with schools
	Outdoor education programs; Porter Creek High uses Mt. Mac	x			Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners
	Great citizen engagement can lead to greater stewardship	x			As per Regional Parks Plan
	Public education campaign on trails and good trail use	x			As per City bylaws and Trail Plan
	Connecting people to where they are	x			As per Regional Parks Plan
	Increased citizen trail stewardship (like a patrol, can provide information, do basic maintenance, and gather information)	x			As per Regional Parks Plan and Trail Plan
Marketing	City could market trails better to visitors and residents who don't use the trails: existing guide is not user friendly and tourists seeing information elsewhere, missed opportunity. E.g.: there is no information on where the trailheads exist; great if you know but what if you don't	x			Plan includes initiative to develop and deliver marketing and communication material
Planning	Trails and Greenway Committee: might get more value if project-based as opposed to ongoing			x	Outside of Plan scope, feedback will be considered by City
	Trails and Greenway Committee: would be stronger if clearer mandate and ToR; City should refocus need and evaluate the desired outputs and outcomes of the committee			x	Outside of Plan scope, feedback will be considered by City
	For engagement, go to Chadburn where people are recreating	x			Draft Plan engagement process will implement tactical engagement in Chadburn Lake Park
	Planning process is opportunity to better understand and plan around ecology of park and surrounding area	x			Planning team included a consultant biologist who curated existing ecological studies
	Chadburn process is first for city, should generate more interest in the area and other parks/processes	x			We are hopeful this planning process and future communication activities will increase resident awareness of this and other Regional Parks
	Planning process opportunity to evaluate existing trails. Do they make sense? Focus on loops	x		x	Trails and Greenways Committee guides trail development and maintenance as guided by Trail Plan; Park Plan establishes management zones to help guide this process
	Develop set of guiding principles for new trails development	x			Park Plan identifies management area types to guide Trails and Greenways Committee interpret Trail Plan and therefore new trail and trail-related infrastructure development
Safety	First aid boxes at certain areas and emergency responder musters points	x			Park Plan identifies initiative to install first aid box(es) and emergency muster points at key locations
	Drinkable water taps at key intersection		x		City does not have the resources to install and maintain drinking water taps at this point
Access	Improve access to Grey Mtn. Summit, better road (need to consider vandalism, may increase or reduce)	x			For future consideration subject to road conditions and sufficient public demand
	Improve Long Lake parking and infrastructure would make it a better destination	x			Plan includes initiative to formalize and improve parking and boat launch at Long Lake
Creative partnership	Biathlon Club looking at partnership with CMBC to better use their facility			x	Outside the scope of the Plan; great to see community groups exploring mutually beneficial partnerships
	Use Yukon College; find win-win opportunities	x		x	Though not formally in the Plan, the Regional Parks Plan speaks to developing a partnership with Yukon College
Tourism	Winter fat-bike tours; Summit trail is a tourism opportunity	x			Plan includes initiatives that support tourism which is consistent with park's recreational, environmental, and heritage values, as guided by Regional Parks Plan
City staff interviews: themes					
Illegal Dumping	Illegal dumping happens in several areas in the park			x	Plan abides by City bylaws which are complaint-driven
	Costs money to clean up			x	Plan abides by City bylaws which are complaint-driven
	Contributes to environmental degradation			x	Plan abides by City bylaws which are complaint-driven
	Negatively impacts user experience, park impressions			x	Plan abides by City bylaws which are complaint-driven
	Restricting vehicle access off the main roads could help			x	Plan abides by City bylaws which are complaint-driven
Trails	Bylaw spends resources responding to trail use conflicts – number of complaints outweighs severity of the problem			x	Plan abides by City bylaws which are complaint-driven
	Hidden Lakes area is where most complaints occur			x	Plan abides by City bylaws which are complaint-driven
	Targeted communication/education could smooth over potential for conflict	x		x	Trail use guided by Trails and Greenways Committee which works with bylaws
	Consider improved trail around Riverdale (could be active transportation route)	x			Plan includes initiative to develop a universally trail around Riverdale
Fires	Party fires and unattended campfires create risk of wildfire	x			Plan includes fire smart and fire abatement activities at various key locations; city bylaws restrict fire-use
	Currently fires are not permitted anywhere in park	x			Plan includes fire smart and fire abatement activities at various key locations; city bylaws restrict fire-use. Dedicated fire-pits created at various day-use areas along Schwatka Lake
	Approach is split between prohibiting fires altogether using stronger enforcement, or allowing in designated areas with well-designed fire pit to reduce risk of causing a wildfire	x			Plan includes fire smart and fire abatement activities at various key locations; city bylaws restrict fire-use
	Risk of wildfire is real (whether or not human-caused) and should consider measures to mitigate risk	x			Plan includes fire smart and fire abatement activities at various key locations; city bylaws restrict fire-use
Signage/Interpretation	Different departments have different signage goals – should coordinate to minimize clutter, maximize efficiency of messaging and ensure consistent look and feel	x			Plan outlines some tangible steps to improve communication
Tourism	Parks offer great opportunity for tourism development	x			Various Plan initiatives designed to support and monitor low-impact tourism activities in the Park
	Need to determine the community's willingness to support tourism activities, and explore what types of activities are appropriate	x			As per Regional Parks Plan; various Plan initiatives designed to support and monitor low-impact tourism activities in the Park
	Tourism impact (positive and negative) should be considered in any new projects	x			As per Regional Parks Plan; various Plan initiatives designed to support and monitor low-impact tourism activities in the Park
Drinking water protection	Hidden lakes area is part of primary aquifer protection area – in general a park is an appropriate use for aquifer protection			x	Outside scope of the Plan; other City and YG policies protect drinking water
	Measures could be taken to educate park users and encourage being responsible (e.g. signage)			x	Outside scope of the Plan; other City and YG policies protect drinking water
	Wouldn't want to see anything that adds risk to groundwater (e.g. large number of pit privies)	x		x	Plan ensure environmental values protected; as per Regional Parks Plan
Sustainability	Park plan has potential to fulfill several goals of Sustainability Plan.	x			As per Regional Parks Plan, as guided by 2010 Official Community Plan
	Consider a no-net-loss approach if adjusting park boundary	x			Chadburn Lake Park Boundary remaining original size and location
	Consider a sustainability target for new infrastructure in park	x			Infrastructure is a critical aspect of how people experience the park. The Plan heavily considers infrastructure design and maintenance that considers recreational, ecological, and heritage values, and is consistent with the multi-use principles set-out in the Trail Plan and Parks and Recreation Plan
Celebrate Parks/Trails	Encourage healthy living; trail stewardship by promoting and celebrating trails	x			As per Regional Parks Plan
	Partner to launch 'featured trails' campaign	x			Plan outlines some tangible steps to improve communication
Emergency Response	Emergency response is limited in park due to lack of vehicle access	x			Park Plan identifies initiative to install first aid box(es) and emergency muster points at key locations
	Consider designing trail network to accommodate emergency vehicles, particularly fire response	x			Park Plan identifies initiative to develop emergency muster points at key locations
Government partners: themes					
Habitat concerns	Caribou (high quality Caribou habitat within park, part of park is used as late winter habitat)	x			Protecting wildlife is a key value of this Park and plan, as per Regional Parks Plan
	Fish (Chadburn is high concern – has a natural lake trout population that is depressed – consider encouraging stocked lakes to reduce pressure on Chadburn)	x			Protecting wildlife is a key value of this Park and plan, as per Regional Parks Plan
	Reducing human/wildlife conflict	x			Protecting wildlife is a key value of this Park and plan, as per Regional Parks Plan

Wildfire Risk and mitigation	Potential for signage/interpretation to communicate habitat information	x			Protecting wildlife is a key value of this Park and plan, as per Regional Parks Plan
	Could involve changing vegetation composition, prescribed burns	x			Plan includes fire smart and fire abatement activities at various key locations; city bylaws restrict fire-use
	Opportunity for interpretive material in fire risk management	x			Plan includes fire smart and fire abatement activities at various key locations; city bylaws restrict fire-use
	Good communication helps change behaviour	x			Plan includes fire smart and fire abatement activities at various key locations; city bylaws restrict fire-use
Forest Management	Well-constructed fire pits could be explored	x			Plan includes fire smart and fire abatement activities at various key locations; city bylaws restrict fire-use
	Need to consider risk of fire and other natural disturbance (i.e. infestation)	x			Plan includes fire smart and fire abatement activities at various key locations; city bylaws restrict fire-use; as per Regional Parks Plan 1.3.1
	Forest needs to be managed to reduce risk and maintain a variety of cover types	x			Plan includes fire smart and fire abatement activities at various key locations; city bylaws restrict fire-use; as per Regional Parks Plan 1.3.1
Heritage	Potential for partnerships in forest management (WFM, FMB, Environment, Renewable Resource Council)	x			Plan includes fire smart and fire abatement activities at various key locations; city bylaws restrict fire-use; as per Regional Parks Plan 1.3.1
	Lots of known heritage in park	x			Plan includes initiatives that support and promote the park's heritage
	Intangibles (place names, stories etc.) are important and should be captured	x			Plan includes initiatives that support and promote the park's heritage
Interpretation	Known heritage resources should be protected, and communicated where appropriate	x			Plan includes initiatives that support and promote the park's heritage
	Ecology, forest management, fire risk, heritage information, lots of opportunity for interpretation	x			Plan includes multiple initiatives to improve education and interpretation opportunities as per Regional Parks Plan
Outdoor education	Potential for new methods – mobile apps in particular: Less clutter, no risk of vandalism, can update info as needed, and can cover a variety of topics and use different media (audio/video, interactive maps, etc.)	x			Plan includes multiple initiatives to improve education and interpretation opportunities as per Regional Parks Plan
	Area is well used for school groups of all grades – important to encourage appreciation, safe and responsible outdoor activities	x			Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners
	Infrastructure is not great – Rotary cabin not in good condition	x			Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners
Signage	Consider partnering to make access easier for school group use	x			Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners
	Important to share information on what people can/can't do and interpretation, but risk of over-signage – users don't want a cluttered park	x			Plan includes initiative to improve trail signage and wayfinding
	Opportunity to coordinate signage for consistency and to reduce clutter	x			Plan includes initiative to improve trail signage and wayfinding
Ideas Fair (Feb 3rd, 2016)					
Ideas Fair: specific comments					
Park size	Seems like overkill for park to be so big		x	x	Park identified in 2010 Official Community Plan and further entrenched by Regional Parks Plan
Accessibility	Concerned about accessibility – has friends that can't walk to Hidden Lakes to fish (age and disability) but can still ride a quad (either driving or as passenger). Should consider options for accessing park features for less mobile people.	x			Plan includes initiatives that improve accessibility in certain high-use areas such as Hidden Lake #2
Sound	Consider sound as part of the experience. Sound of snowmobiles/quads 'ruins' the experience of being in nature			x	Plan abides by City bylaws
Mountain bikers on trails	Mountain bikers have 'it's our trail' attitude and don't respect other users. Causing trail erosion, especially on trails above the tree line (possibly Money Shot?)			x	Trails and Greenways Committee guides trail activities as per Trail Plan and is forum for etiquette
Park planning process	Queried where the park plan idea came from and why the City feels it has the mandate to manage the park.			x	Park identified in 2010 Official Community Plan and further entrenched by Regional Parks Plan
Grasslands	Whether the ESA model took grassland into account – mainly occurring on exposed slopes and vulnerable due to ease of transit.	x			Grasslands conservation reflected in the Plan as well as Background Report
Orienteering	Emphasized orienteering value of the area east of Long Lake (the park boundary bisects the high quality area) and also inside Chadburn Blue North loop. Both areas high quality because of varied terrain and no trails. A new trail through a good orienteering area would downgrade it from world class to entry-level	x		x	Are located in 'Conservation Management Area' which allows low-impact recreation; rest of area beyond Park boundary; City aware of orienteering interests in area
City water supply	Need to protect source water aquifer. More concerned about the developed area (Riverdale) but the primary protection area extends into park as well. One thimble-full of gasoline can contaminate a swimming pool beyond acceptable levels. It is nearly impossible to remediate a source contaminated by hydrocarbons.			x	Outside scope of the Plan; other City and YG policies protect drinking water
Grey Mountain Road, last section	Northwestel believes they have title to Grey Mountain Road beyond the lookout			x	This has been investigated by the City; the entire road belongs to the City though Northwestel and other telecommunication organizations maintain the road on an ad hoc basis.
Park Board	Suggestion of creating a park board to oversee management of the park. Gave Hastings Park in Vancouver as comparable example.			x	Not considered in Park Plan; considered in Regional Parks Plan
Schwatka east shore rehabilitation	East shore of Schwatka lake as priority area for rehabilitation. Numerous ambiguous entry points and opportunities for vehicles to drive right up to shore (or edge of ridge above the shore), not clear where vehicles are or aren't permitted, lots of areas impacted by vehicle use. Could look for opportunities to improve day-use facilities (picnic tables, garbage, Porto potty, interpretive material) and remediate natural features	x			Plan includes initiatives to improve Schwatka day-use areas and associated trails
Site for Medieval Combat Group	Their site requirements are simple, clear open space, but there is value to being in a natural setting. They've held events at Biathlon lease area but are concerned that there could be challenges to their permission to use the space. Biathlon is fine with it but being the leaseholder could always change their minds, but there is also possibility that City might take issue with the arrangement essentially being a sub-lease. They also would like to have an indoor facility.	x			Plan open to proposed recreation development ideas in Recreation Areas
Observatory	Astronomy group – wants to set up an observatory at the lookout on Grey Mountain Road. Open to any arrangement that complements other uses. Also want to set up night sky viewing platforms throughout the City, have locations in mind within the park. Again, open to complement other uses. Would be interested to pursue having the park designated as an urban star park	x			Plan includes initiatives that support the development of an observatory
Geology interpretation	Geology is often overlooked piece of the environment story. Has big impact on vegetation, land use patterns, also big part of the heritage story. Lots of development throughout City began as prospecting/exploration/extraction.	x			Plan includes multiple initiatives to improve education and interpretation opportunities as per Regional Parks Plan
Outdoor education centre	Park is very important for outdoor education. It's close and accessible, and safe. Has been pitching the idea of an outdoor education centre at Chadburn Lake. Could be opportunity for joint management/programming with City or other agency	x			Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners
Ideas Fair: general observations					
Value of planning process	Numerous people commented that Chadburn Park doesn't present a "problem in need of 'fixing'"; rather, the value in this process is the official protection of the space indefinitely"	x		x	Chadburn Lake Park was identified in the 2010 Official Community Plan, and further entrenched in the Regional Parks Plan

Recreation and trails are important	People focused very much on their primary mode of interaction with the park: recreation. Particularly trails.	x			Recreation values as are key component of the Plan; as per Regional Parks Plan
Ecological and heritage input	We didn't get much input on ecological or heritage values.	x			Plan includes initiatives that support and promote the park's heritage
Level of future development	Some "push/pull" around appropriate development, but generally people converge around the same values of rustic, undeveloped, etc.	x			Plan upholds wilderness values as directed by Regional Parks Plan
Demographic observation	Noticeable demographic divide between the "pro-development" (small-scale of course) and "anti-development". Younger people, particularly those with small children, expressed support for accessible backcountry opportunities in Chadburn. Those expressing skepticism about those ideas were generally 55+.			x	Plan upholds wilderness values as directed by Regional Parks Plan
Strong support for 4 development concepts	Expressions of support for multi-use trails originated primarily from younger participants, whereas the few comments about single-use trails or conflict issues generally originated from older participants.	x			Plan considers single-use trail designation where multi-use adversely impacts cultural and /or ecological resources and/or compromises user safety. Plan consistent with Trail Plan which supports multi-use trail development.
	Multi-use trail networks	x			Plan considers single-use trail designation where multi-use adversely impacts cultural and /or ecological resources and/or compromises user safety. Plan consistent with Trail Plan which supports multi-use trail development.
	Expansion of trail network (termed "mountain bike" trails but technically "single-track" trails)	x			Plan considers single-use trail designation where multi-use adversely impacts cultural and /or ecological resources and/or compromises user safety. Plan consistent with Trail Plan which supports multi-use trail development.
	Outdoor learning centre at Chadburn Lake	x			Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners
	Revamped day use area at Chadburn Lake	x			Plan includes initiative to improve Chadburn Lake day use area including an expanded beach area
Ideas Fair: Ideas, opportunities and priorities (# denotes number of 'votes')					
Ecology and environment	Purposefully not developing access in areas of ecological priority (+4)	x			Protecting wildlife is a key value of this Park and plan, as per Regional Parks Plan
	To be able to continually see and hear grizzly bears, black bears, moose, wolves, herons, loons, beaver, otters, and yes – deer and hopefully a cougar!	x			Protecting wildlife is a key value of this Park and plan, as per Regional Parks Plan
	Chadburn lake trout are special	x			Protecting wildlife is a key value of this Park and plan, as per Regional Parks Plan
	Forest fire abatement needs to be addressed; Fire Smart doesn't cut it!	x			Plan includes fire smart and fire abatement activities at various key locations; city bylaws restrict fire-use
Education	Outdoor learning centre at Chadburn Lake (+16)	x			Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners
	Family/youth camps; tourism and interpretation; local organizations can rent; First Nations usage for gatherings; overnight school trips; child and youth programming	x			Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners
	Programs and learning opportunities (ecology, First Nation traditional knowledge, experiential education)	x			Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners
	Canoe/paddle board rental and outdoor classrooms	x			Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners
	Maintain walk-in access only to the centre – there may be better locations for this (i.e., McIntyre Creek/College)	x			Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners
	Information/signs to educate users on hike vs. bike vs. ski trail maintenance and consideration (+3)	x			Plan outlines some tangible steps to improve communication
	Trail user etiquette education – particularly around who yields between downhill bikers and uphill hikers	x			Plan outlines some tangible steps to improve communication
	Build opportunities for experiential education (science, heritage, archaeology, etc.)	x			Plan includes multiple initiatives to improve education and interpretation opportunities as per Regional Parks Plan
General park use and access	No commercial development (+6)	x			Regional Parks Plan does not allow for commercial development that does not meet park values. Low-impact recreation and education infrastructure that can be used by low-impact tourism is permitted.
	The opportunity exists to keep a large area development-free for generations to come. If and when Whitehorse becomes a large city it will be incredible to have a large natural park space in the city limits (+6)	x			Park vision considers future growth and is consistent with the Regional Parks Plan
	Accessible – or certain points accessible i.e., to water (+1)	x			Plan includes initiatives that improve accessibility in certain high-use areas such as Hidden Lake #2
	Maintain commercial tourism opportunities (guided biking, hiking, paddling; enhanced staging area; enhanced interpretation, etc.)	x			As per Regional Parks Plan and Community Economic Development Strategy
	Tourism: accessible wilderness opportunities; good maps/signage that are up-to-date; parking, bathrooms, safety	x			As per Regional Parks Plan and Community Economic Development Strategy
	Better to focus infrastructure and recreational development in this area than in "true" wilderness	x			Infrastructure is a critical aspect of how people experience the park. The Plan heavily considers infrastructure design and maintenance that considers recreational, ecological, and heritage values, and is consistent with the multi-use principles set-out in the Trail Plan and Parks and Recreation Plan
	Access and exit points are important, especially for things like First Aid access	x			Park Plan identifies initiative to install first aid box(es) and emergency muster points at key locations
Other recreation	World-class orienteering terrain with challenges for youth to elite (+4)	x		x	Are located in 'Conservation Management Area' which allows low-impact recreation; rest of area beyond Park boundary; City aware of orienteering interests in area
	Maintained pond hockey rinks @ Chadburn or Hidden Lakes (cleared and flooded)			x	Maintained pond hockey rinks are outside the scope of this Plan, however residents are welcome to play hockey on frozen lakes at their own risk
	Create family fishing destinations at Hidden Lakes 1-3, Long Lake and Chadburn Lake: designated (stocked) fishing, areas cleared for families, multiple areas for fishing different species	x			Plan includes initiative to support development of a family fishing area destination at Hidden Lake #2
	Paragliding – there is a wonderful ridge on other side of road suitable for year-round paragliding but landing zone needs development	x			Plan allows development ideas in Recreation Areas
	There are some great rock climbing areas on Grey Mtn. Some access trails would be awesome!	x		x	Rock-climbing supports the Park's recreation values; new trail development must be vetted by the Trails and Greenways Committee and consider the plans Management Area designations
	Improved paragliding: permanent windsock, kiosk/sign, improved landing zone, increased ridge	x			Plan allows development ideas in Recreation Areas
	Maintain opportunities for "natural" (untracked/groomed) skiing	x		x	Cross-country skiing supports Park's recreation values; combination of groomed and ungroomed trails provide a diversity of skiing experiences
	Chadburn is a great spot for my scuba students! And divers can do a cleanup at Chadburn and Schwatka boat launches.	x			Low-impact recreation supports Park's recreation values; citizen garbage cleanup's are a great way to build stewardship, thanks for the offer!
	Wildlife viewing: seems like deer population increasing in Riverdale	x			Protecting wildlife is a key value of this Park and plan, as per Regional Parks Plan
Process	Provide oversight to recreational development, but continue user engagement	x			Infrastructure is a critical aspect of how people experience the park. The Plan heavily considers infrastructure design and maintenance that considers recreational, ecological, and heritage values, and is consistent with the multi-use principles set-out in the Trail Plan and Parks and Recreation Plan
	City could help community groups identify needed infrastructure/projects to increase engagement and to share costs – such as trail kiosks	x			Infrastructure is a critical aspect of how people experience the park. The Plan heavily considers infrastructure design and maintenance that considers recreational, ecological, and heritage values, and is consistent with the multi-use principles set-out in the Trail Plan and Parks and Recreation Plan
Trails, trail-use, and trail signage	Multi-use trail systems (+18)	x		x	Plan follows Regional Parks Plan and Trail Plan, which support multi-use trails where appropriate
	Continue building world-class mountain bike trail network (+11)	x			Plan follows Regional Parks Plan and Trail Plan which work with Contagious Mountain Bike Club
	Having Magnusson trail machine groomed again has been great! Being able to take my kids for a walk in the sled is wonderful (+7)			x	As per Trails and Greenways Committee

	My priorities are recreation! Mountain biking, snow biking, and trail running. So many people benefit from these activities in the park (+2)	x			Recreation is an important Park value as guided by the Regional Parks Plan
	Cycling here is amazing! (+2)	x			Recreation is an important Park value as guided by the Regional Parks Plan
	Incorporate art/heritage into wayfinding signage (+2)	x			Plan includes initiative to improve trail signage and wayfinding
	Look at possibility of establishing a few single-use trails for safety reasons and to reduce conflict (+1)				Plan considers single-use trail designation where multi-use adversely impacts cultural and /or ecological resources and/or compromises user safety. Plan consistent with Trail Plan which supports multi-use trail development.
	Groomed trails in winter – snowmobile grooming makes the trails accessible for lots of people (+1)			x	As per Trails and Greenways Committee
	Prohibit motorized access please (+1)		x	x	Trail Plan allows for motorized trail use in certain areas; MMU trails recently designated in Chadburn Lake Park area
	If motorized recreation is to be allowed, define and enforce such zoning		x	x	Trail Plan allows for motorized trail use in certain areas; MMU trails recently designated in Chadburn Lake Park area
	Keep single-track trails single and repair areas that have been eroded by misuse or ORVs	x		x	Plan identifies habitat and trail restorations; Trails and Greenways Committee guides trail activities; City trail crews and partners maintain trails
	Interpreted geology summit trail on Grey Mountain, with a mid-mountain collector	x			Plan includes multiple initiatives to improve education and interpretation opportunities as per Regional Parks Plan
	Trail markers with small discs on trees	x			Plan includes initiative to improve trail signage and wayfinding
	Continue to build trails and access points	x		x	Trails and Greenways Committee guides trail activities as per Trail Plan as consistent with Park values and designated management areas
	Great trails: winter grooming would be awesome and clear signage indicating motorized versus non-motorized use				Plan outlines some tangible steps to improve communication
	The hiking/biking is just magnificent – using the Whitehorse Trails app makes getting lost impossible	x			Recreation is an important Park value as guided by the Regional Parks Plan; glad to see an amazing local app being used
	Designate a branded Yukon River Trail (non-motorized) through park area and select a route through Chadburn ski trail area along river that doesn't interfere with grooming	x			Plan identifies branding as key initiative
	Continue to maintain/develop a sustainable riverside trail – users enjoy trails along water and the 'handrail' of a river for navigating and not getting lost is comforting	x		x	As per Trail Plan and Trails and Greenways Committee
	Having a motorized multi-use trail connecting Chadburn to Cantlie Connector (Long Flat Trail) so motorized users have a loop that encourages compliance vs. going off trail			x	Beyond the scope of this plan; new trails vetted by Trails and Greenways Committee and MMU trails already identified in Chadburn Lake Park area
	Construct a "flow" trail in the Magnusson/Southpaw area that is accessible to beginners and experts	x			Plan identifies flow trail as an initiative as high recreation potential as per 2.1.1 in Regional Parks Plan
	Whitehorse Trail App is a great start but still too many options (overwhelming). Focus activity on signed "feature" trails to increase accessibility and concentrate impacts			x	Beyond scope of this Plan
	Having paper maps available	x			Plan includes initiative to improve trail signage and wayfinding
Interpretation	Connect stories about heritage/past to physical places (+2)	x			Plan includes initiatives that support and promote the park's heritage
	Bat house interpretative signs	x			Plan includes initiatives that support and promote the park's heritage
	Educational knowledge boards (forest, water, geology, biology info) along all trail types	x			Plan includes initiatives that support and promote the park's heritage
	Want to continue learning about heritage and history of the place	x			Plan includes initiatives that support and promote the park's heritage
Visitor infrastructure	Chadburn day use area concept (+16): have a canoe loading/unloading access or lane, add a fireworks pit, need room for van turn-around, few tons of sand and a good dock; day use area for families to swim, kayak, canoe and sail	x			Plan includes initiative to improve Chadburn Lake day use area including an expanded beach area
	Year-round outhouses, especially at Chadburn (+6) (outhouses have been vandalized continuously in past)	x			Plan includes initiative to improve Chadburn Lake day use area; install year-round outhouses at key park locations
	Backcountry cabins in nice locations i.e. Grey Mountain summit area (+5)	x	x		Cabins are not feasible for the City, however the Plan recommends the provision of remote access wilderness camping opportunities
	Easy overnight walk-in/paddle-in campsites (+4)	x			The Plan recommends the provision of remote access wilderness camping opportunities to enhance visitor experience
	Outhouse at Long Lake (+3)	x			The Plan includes initiatives to install year-round outhouses at key park locations
	Clubhouse for use by different clubs at Chadburn (+1)	x	x		Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners
	Sports groups could use a clubhouse as part of the outdoor centre (+1)	x	x		Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners
	More cabins and designated campsites for ski/bike/hike-in (+1)	x	x		Cabins are not feasible for the City, however the Plan recommends the provision of remote access wilderness camping opportunities
	Overnight opportunities (+2)	x			The Plan recommends the provision of remote access wilderness camping opportunities
	Plan new connection over Yukon River downstream of Riverdale for non-motorized and emergency trails; allows loop trails to downtown which will have increased population (+1)			x	Beyond the scope of this plan; City aware of additional bridge proposal
	Bridge from downtown to hospital area			x	Beyond the scope of this plan; City aware of additional bridge proposal
	Additional river crossings/footbridges to be able to create more loops on either side of river			x	Beyond the scope of this plan; City aware of additional bridge proposal
	Signage at park gateway highlighting experiences	x			Plan includes initiative to improve trail signage and wayfinding
	Have a winter fire pit at the Chadburn Lake shelter; expand seating/eating space (+2)	x			Plan includes initiative to improve Chadburn Lake day use area
	Pilot non-permanent structures for overnight use – potential business opportunity or could be sponsored	x	x		Cabins are not feasible for the City, however the Plan recommends the provision of remote access wilderness camping opportunities
	Footbridge over peninsula at Hidden Lakes	x	x		Bridge not within City budget, however Plan includes initiatives that improve accessibility in certain high-use areas such as Hidden Lake #2
	Improve road access to boat launch at Long Lake and formalize second parking area	x			Plan includes initiative to formalize and improve parking and boat launch at Long Lake
	Observatory	x			The Plan supports the development if an observatory as led by a third-party
	Photo posts like Ontario (ask YCS)	x			Plan includes initiative to improve trail signage and wayfinding
Ideas Fair: Challenges and solutions (# denotes number of votes)					
Trails	Ski tracks at Chadburn for skis only! (+6)			x	Trails and Greenways Committee guides trail activities as per Trail Plan and is forum for etiquette
	Chadburn ski trail: Need a sign informing people to not walk on the ski tracks. Thanks. (+4)	x		x	Trails and Greenways Committee guides trail activities as per Trail Plan and is forum for etiquette; Plan includes initiative to improve trail signage and wayfinding
	Trail erosion around Miles Canyon- guide people to stay on trails with natural borders (rocks) especially around switchbacks. (+2)	x			Plan includes initiative to improve recreation infrastructure along Schwatka Lake
	Magnusson ski trails are no longer great to ski on due to packing of trails for snow biking. (+1)			x	Trails and Greenways Committee guides trail development and maintenance as guided by Trail Plan; Park Plan establishes management zones to help guide this process
	As of 2016, we have plenty of trails, parts of the woods looking like a spaghetti map. We need a better balance of leaving things as they are vs. novelty access. (+1)	x			Plan identifies trail improvements in various braided trail areas including Schwatka Lake and alpine areas
	Too many parallel, branching trails. Focus use to certain areas with self-guided tour documents/apps. (+1)	x			Plan identifies trail improvements in various braided trail areas including Schwatka Lake and alpine areas
	I miss classic ski trails (even with grooming) at Magnusson trails. They don't seem like ski trails anymore. (+1)			x	Trails and Greenways Committee guides trail development and maintenance as guided by Trail Plan; Park Plan establishes management zones to help guide this process; there are many un-groomed trails in the Park (see 'colour' trails)
	Too many side trails degrading soils. Solution: Build main trail system for biking, skiing, hiking. (+1)	x			Plan identifies trail improvements in various braided trail areas including Schwatka Lake and alpine areas

	Trail maintenance must consider all users – different users appreciate different types of maintenance. (+1)	x			Plan considers single-use trail designation where multi-use adversely impacts cultural and /or ecological resources and/or compromises user safety. Plan consistent with Trail Plan which supports multi-use trail development.
	Unlimited trail building detracts from wilderness feel and makes orienteering poor. (+1)	x			Future trail development led by Trails and Greenways Committee as guided by Trail Plan and Park Plan Management Areas
	Controlling the creation of new trails in the area.	x			Future trail development led by Trails and Greenways Committee as guided by Trail Plan and Park Plan Management Areas
	Good remote access to Chadden + Hidden lakes.	x			Recreation access that considers wilderness values are a key component of this Plan
	Challenge: Monitoring park/ site/ trail usage will be difficult, but is important when considering development/enhancement within the area.				Monitoring is an identified initiative in the Plan
	Keep single-track trails single by establishing maintenance standards for different types of trails.	x			Plan considers single-use trail designation where multi-use adversely impacts cultural and /or ecological resources and/or compromises user safety. Plan consistent with Trail Plan which supports multi-use trail development.
	Safe trails/ access in winter. Ex. Slippery slopes/ ungroomed steep sections. Commit to "up-track/down track trail development and maintenance			x	Trails and Greenways Committee guides trail development and maintenance as guided by Trail Plan; Park Plan establishes management zones to help guide this process
	Have more shared trails old roads MMU so that all can enjoy. Have smaller trails on non-motorized trails. Have times of year that all wheeled traffic not allowed. Don't forget that disabled people want out also.	x			Plan considers single-use trail designation where multi-use adversely impacts cultural and /or ecological resources and/or compromises user safety. Plan includes initiatives that improve accessibility in certain high-use areas
	Trails through wet or low-lying areas should be moved or bridged to maintain water flow.	x			Plan identifies initiative to re-design or locate recreation infrastructure that adversely impacts ecological value and ESA 1 and ESA 2 areas
	Magnusson ski trails, too narrow for bikers mixed with skiers. Unsafe for skiers. Designate separate loops for each use.	x		x	Plan considers single-use trail designation where multi-use adversely impacts cultural and /or ecological resources and/or compromises user safety. Plan consistent with Trail Plan which supports multi-use trail development.
	I agree with the spaghetti of trails. If implementation of trails (or formalizing of existing trails) is done thoughtfully- with an eye for elegant, beautiful trails, it could help limit people making their own additions of trails.	x			Plan identifies trail improvements in various braided trail areas including Schwatka Lake and alpine areas
	Smart Design. Trail use plan, better signage, smarter infrastructure- separate parking from day use- remediate shortage.	x			Plan identifies several initiatives that integrate design into future development and ongoing maintenance
	Schwatka Lake Trail: So beautiful, so accessible so sought after by public drinkers, partiers, etc. and (less and less by) families, hikers, etc. How can we make those pullouts less attractive to partying/ drinking/ littering and more attractive to families for picnics, hikes with small children, etc.? Solution: Design elements to keep vehicles back from the lake? Formalize picnic, fire, garbage, etc.	x			Plan includes initiatives to improve Schwatka day-use areas and associated trails
Recreation	Ski tracks being walked on- signage indicating alternate routes or practices? (+2)	x		x	Trails and Greenways Committee guides trail activities as per Trail Plan and is forum for etiquette; Plan includes initiative to improve trail signage and wayfinding
	Solution – Education. We have the space. And we have a chance to LEAD in the concept of sharing between users. I Love that idea. (+2)	x		x	Plan follows Regional Parks Plan and Trail Plan, which support multi-use trails where appropriate
	Please don't let us ever become a California where users fight and trails are closed to some groups. We have the space- let's share! (+2)	x		x	Plan follows Regional Parks Plan and Trail Plan, which support multi-use trails where appropriate
	Winter biking at Magnusson and Hidden Lakes (+2)			x	Trail use guided by Trails and Greenways Committee in accordance with Park Plan
	Leave purple areas undeveloped, even trails, for world-class orienteering. (+2)	x		x	Are located in 'Conservation Management Area' which allows low-impact recreation; rest of area beyond Park boundary; City aware of orienteering interests in area
	Do not use the Park creation process to limit trail access to certain users types. Multi-use trails benefit everyone! I agree (+1)	x		x	Plan follows Regional Parks Plan and Trail Plan, which support multi-use trails where appropriate
	Separate trail use- skiing vs. walking. Chadburn needs sign. (+1)	x		x	Trails and Greenways Committee guides trail activities as per Trail Plan and is forum for etiquette; Plan includes initiative to improve trail signage and wayfinding
	Will new user groups be able to attain leases for their activities?			x	Beyond direct scope of Plan. All lease-seekers should contact City. Future leases will be judged based on compatibility with Park Plan
	Hidden Lakes fishing decreasing quality due to Kokanee.			x	Fish-health jurisdiction on YG
	No motorized vehicles.			x	Plan follows Regional Parks Plan and Trail Plan, which support multi-use trails where appropriate
	I like snowmobiling and riding my ATV. I don't like loud snowmobiles or ATVs, so a balance needs to be achieved so that I can continue my motorsports without irritating others!	x		x	Plan follows Regional Parks Plan and Trail Plan, which support multi-use trails where appropriate; Plan is consistent with City's existing Snowmobile Bylaw and Parks and Parks and Public Open Space Bylaw
	Gun range noise: maybe reduce gun caliber or require silencers.			x	Plan is consistent with City bylaws
	My main concern is people who want to exclude other users. We should respect each other. We all love the trails and can live together.	x		x	Plan follows Regional Parks Plan and Trail Plan, which support multi-use trails where appropriate
Infrastructure	Better trail signage. (Ex. 3km easy loop) (+3)	x			Plan includes initiative to improve trail signage and wayfinding
	Containment!! Ex. Recreation infrastructure and but more not always better. Better to do a few things well than lots badly. (+2)	x			Plan identifies trail improvements in various braided trail areas including Schwatka Lake and alpine areas
	Parking lot/ waterfront on Chadburn Lake needs attention. (+2)	x			Plan includes initiative to improve Chadburn Lake day use area including an expanded beach area
	Directional signage on Magnusson, Bike here/ ski here. (2 red)	x			Plan includes initiative to improve trail signage and wayfinding
	Big problems with noise, dust and garbage. "Picnic" areas along Schwatka- these need complete redevelopment. (+2)	x			Plan includes initiatives to improve Schwatka day-use areas and associated trails
	Would really appreciate outhouses at Chadburn! (Increase accessibility for woman and children) (+1)				The Plan includes initiatives to install year-round outhouses at key park locations
	The cabins on Chadburn Lake are tired. (+1)	x			Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners
	Providing infrastructure ex. Docks maybe have sponsorship opportunities like Rotary Bridge planks. Business operating in park could sponsor facilities and have a plaque recognizing contribution.	x			Infrastructure is a critical aspect of how people experience the park. The Plan heavily considers infrastructure design and maintenance that considers recreational, ecological, and heritage values, and is consistent with the multi-use principles set-out in the Trail Plan and Parks and Recreation Plan
	Improve road access to top of Gray Mountain.	x			For future consideration subject to road conditions and sufficient public demand
	Separate boat launches for motorized and non-motorized on Schwatka Lake.	x		x	City does not have the resources to install and maintain separate boat launches at this point; Plan includes initiatives to improve Schwatka day-use areas
	Better access to trail maps (maybe orienteering maps?)	x			Plan includes initiative to improve trail signage and wayfinding
Garbage and partying	Partying and resulting garbage along Chadburn Lake in day use areas. (+4)	x			Plan includes initiative to improve Chadburn Lake day use area including an expanded beach area
	Garbage is a problem. (+1)	x			Plan includes initiative to improve day-use areas at Schwatka, Chadburn Hidden and Long Lake
	Create safe legalized campfire pits to reduce number of illegal fires occurring and reduce risk and ash in lakes. (+1)	x			Plan includes initiative to improve day-use areas at Schwatka, Chadburn Hidden and Long Lake
	Hidden Lakes parking/ turn-around is a party spot and a mess - make it nicer? (+1)	x			Plan includes initiative to improve day-use areas at Schwatka, Chadburn Hidden and Long Lake
	Litter and garbage (especially by the picnic spots on the Lakefront) is getting worse every year.	x			Plan includes initiative to improve day-use areas at Schwatka, Chadburn Hidden and Long Lake
	Risk of forest fire due to bush partying in spring (Grad??) and summer.	x			Plan includes initiative to improve day-use areas at Schwatka, Chadburn Hidden and Long Lake
	Bush party spots and litter.	x			Plan includes initiative to improve day-use areas at Schwatka, Chadburn Hidden and Long Lake
Education and enforcement	A new outdoor education access center/ interpretation center would be great (+4)	x			Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners
	Outdoor schools/ lamps. Profit or social enter park. Regular, presence in party areas. (+2)	x			Plan includes initiative to support development of an outdoor education centre at Chadburn Lake, as led by outside partners

Ecology and environment	Have staff? Officers? Someone check in at party areas more frequently to reduce bush-party damage.	x	x	x	Plan abides by City bylaws which are complaint-driven
	Leave no trace activities should be encouraged. Tours or activities that don't need facilities or buildings or storage sheds. (+2)			x	As identified in the Regional Parks Plan
	Maintaining naturalness (+2)	x			As identified in the Chadburn Lake Park vision
	High use areas should still be left as undeveloped/ natural as possible. High use (=/ not) license to develop. (+1)	x			As identified in the Chadburn Lake Park vision; Plan identifies Management Areas
	Leave shorelines at Chadburn natural and unmanicured. (+1)	x	x		Plan includes initiative to improve Chadburn Lake day use area including an expanded beach area in day-use area only
	With increase deer- I worry sometimes about cougars-have there been sightings?			x	YG manages wildlife
	What are we doing about increasing deer populations? (watch them)			x	YG manages wildlife
	Ice fishing: Gasoline powered ice auger may pollute small Lakes. Solution: Limit ice drilling to manual ice augers.			x	Not identified in current City bylaws
	Please keep eco-sensitive areas intact and all traffic off. From foot to motorized.	x			Plan identifies areas of high conservation value through Management Areas
	Please keep all wildlife connectivity corridors open: even small animals.	x			Plan identifies areas of high conservation value through Management Areas balances recreation and environmental values
	Please consider widening the wildlife corridor for moose and other wildlife connectivity.	x			Plan identifies areas of high conservation value through Management Areas balances recreation and environmental values
	Challenge: Increase number of successful Common Loon nesting/ hatches in area. Solution: Have boaters leave dogs at home. Individually stay away from nests sites.	x			Plan includes initiative to develop dog-owners education program and materials to promote responsible dog walking in sensitive ecosystems and wildlife areas, including shorelines
	Footprints need to be established for each activity.				Various Plan initiatives designed to support and monitor low-impact recreation and tourism activities in the Park
Camping	NO overnight stays and camping, leave as natural as possible (+4)		x		The Plan recommends the provision of remote access wilderness camping opportunities to enhance visitor experience and seen as consistent with Park vision
	Make establish campsites to reduce the impact of people camping in unregulated areas and damaging the brush/ landscape. (+1)	x			The Plan recommends the provision of remote access wilderness camping opportunities to enhance visitor experience
	I like day use only. Concerned that overnight opportunities will change character, have increased impact, and be somewhat exclusive use of space. Other places in Yukon Territory for such overnight opportunities. (+1)		x		The Plan recommends the provision of remote access wilderness camping opportunities to enhance visitor experience and seen as consistent with Park vision
Commercial	Focus commercial activity at specific areas (no need to sprawl). Develop some infrastructure to mitigate effects, bathrooms, picnic area, docks/ paths	x			Regional Parks Plan does not allow for commercial development that does not meet park values. Low-impact recreation and education infrastructure that can be used by low-impact tourism is permitted.
	Limit size of any commercially guided groups.	x			Various Plan initiatives designed to support and monitor low-impact recreation and tourism activities in the Park
	Question: What is the app. Level of commercial activity in the park? Answer: It is difficult to "assign" an appropriate level, but it's important to maintain a balance between local, non-commercial activity and opportunities for commercial tourism. I think allowing physical infrastructure for commercial purposes is too far (ex. Don't build common storefronts), but allowing tour operators to use the trails, staging areas, education facilities, ect. Would be appropriate	x			Various Plan initiatives designed to support and monitor low-impact tourism activities in the Park
Heritage	Developing a management plan now, for a much used area (Canyon City) which is part of a future heritage site in co-management with Yukon Government under KDFN chapter 13. That will be challenging to plan now I would believe. Solution: get YG and KDFN involved now.	x			KDFN is the lead government behind any future interpretive planning and Canyon City; City and YG to support
Planning and management	Realizing how lucky we are as northerners and how much great space we have to play in. We can all play together and rarely see anyone. (+1)	x			We agree and hope that Park vision reflects resident and visitor park values
	Park is very large. Croucher Creek area could be its own park. Plan for increased population and urban development near lakes.			x	City is considering long-range planning of area of part of other City processes outside scope of this project and Park boundary
	Share information with public on maintenance costs. How much does it cost to maintain motorized multi-use? How much does it cost to maintain single track non-motorized?				
	We need a Chadburn Parks Board with non-partisan public thinkers- Renewable, Heritage and Recreation to monitor development.			x	Regional Parks Plan identified various Park management mechanisms to be explored
	How do we resolve the disagreement between those who want: Zero development, all access (motorized and non-motorized), separate trails, shared trails?	x			Plan follows Regional Parks Plan and Trail Plan, which support multi-use trails where appropriate
Ideas Fair: Creative Partnerships					
Yukon Medieval Combat Group	Yukon Medieval Combat Group is a new sport org and as we grow will be looking to find space to establish a permanent presence. This could be a small parcel of land to create an indoor training space for winter and an outdoor space for holding competition and summer training	x			Plan allows for compatible development in Recreation Areas
Whitehorse Walks	The park could be a jewel in a walkable city. I would be interested in talking about how to do this.	x		x	Great! Creative partnership is part of the Regional Parks Plan
Department of Tourism and Culture	Interested in heritage and interpretative signage	x			Great! Creative partnership is part of the Regional Parks Plan; Plan includes multiple initiatives to improve education and interpretation opportunities as per Regional Parks Plan
	Interested in visitor experience and park usage	x			Great! Creative partnership is part of the Regional Parks Plan; Plan includes multiple initiatives to improve education and interpretation opportunities as per Regional Parks Plan
	Interested in resources (maps, guides etc.) to share with visitors	x			Great! Creative partnership is part of the Regional Parks Plan; Plan includes multiple initiatives to improve education and interpretation opportunities as per Regional Parks Plan
	Interested in discussing opportunities for commercial tourism	x			As per Regional Parks Plan and Community Economic Development Strategy
Yukon Parks	Share information and best practices on park management and operations	x			That would be great and the City would also be willing to share
	Connecting people with the benefits of nature	x			As per Regional Parks Plan
General input received					
Keep trails multi-use	Concern mountain bikers will loose access to trails due to a few vocal opponents based on 'principle' rather than actual conflict	x			As per City Trail Plan
Keep current trail status	Continue to allow motorized trail access to Cantlie Lake, continue to allow amazing single-track to be developed for mountain biking and promote more snow-biking	x			As per City Trail Plan and East Yukon River MMU Trail designations
User conflict mitigation	I was told we don't really have trail-use conflicts now. OK, but if this is a long-term planning process what needs to happen to know to ensure we mitigate future conflict? We know use is increasing.				
Priorities	I would like to see the plan prioritize environment, heritage and recreation in that order	x	x		The Park Plan is based in the values outlined in the Regional Parks Plan. Environment, recreation and heritage are all values identified though no value is explicitly prioritized
Car-accessible picnic areas	I think there is a need to separate car accessible, safe picnic and BBQ areas X meters away from high value natural and man-altered waterfronts. Needs to be a proper road system for picnic sites. Consider picnics and toilets at Grey Mountain summit.	x			Plan includes initiatives to improve Schwatka day-use areas and associated trails
Improve Grey Mountain for picnics	Consider picnics and toilets at Grey Mountain summit.	x	x		Plan includes initiative to improve the Grey Mountain Summit trail. City does not have resources at this time to maintain a toilet at the summit.

Improve signage	Consider new signs on Grey Mountain road and Chadburn road indicating people are entering the park, get the key messages out there Respect. Environment, stay on designated trails, report violations etc...	x			Plan includes initiative to improve trail signage and wayfinding.
Improve picnic areas: YG	This is a big one, but consider having YTG parks actually plan, build and manage the (new) picnic areas including road development, location of toilets etc. They have the expertise in this area and may be able to hand		x		Yukon Government, Yukon Parks does not have the mandate to develop facilities within the City Boundary with the exception of Wolf Creek Campground
More enforcement	Will we need gates or patrols at night?? Kootkasoon is good example of how it can be done. Only the picnic areas and those places that could be vandalized through parties and fires would be gated	x	x		Plan abides by City bylaws which are complaint-driven
Keep trail users separate	Keep users separate. Multi-use trails, when speed is involved, create conflict. Single track trails are preferred and reduce impact on plants and animals, but these are the most hazardous for different directions and activities. A good example are the trails beside Yukon River south of Canyon City. They are steep single track and dangerous for hikers, dogs and bikers all using at the same time.			x	As per City Trail Plan; at this time the City promotes and implements multi-use trails
Do not connect Cantlie Lake Rd. to Chadburn	Do not consider an ATV or Skidoo route from Chardurn to Cantlie Lake rd. This is in the centre of most sensitive, attractive and quiet areas of the park. The noise and environmental degradation not to mention user conflicts would be very substantial.	x			As per City Trail Plan and East Yukon River MMU Trail designations, Cantlie Lake Road will not connect to Chadburn Lake
Noise Scaping	Consider removing gun clubs unlimited outside shooting. It seems the size and noise of many guns is vastly greater than what it has been in the past. Probably not an issue with .22 caliber rifles. Plan picnic areas to be away from road noise and dust			x	Outside of scope of Park Plan. Lease renewed with Gun Club prior to planning process
Parks Board	Consider a Parks Board with a relatively small membership to reflect park planning and management priorities of respected thoughtful citizens with no special interest conflicts. Composition should be as follows : Biologist/renewable resource background, First Nations cultural background, Recreation specialist, one member from tourism Yukon and perhaps(or not) a City Councillor as chair. This Board would review budget, administration activities and management of the park and its resources, user (mainly recreational) issues, long and short term planning and oversight based on approved plans			x	Not considered in Park Plan; considered in Regional Parks Plan
Increase ski trail grooming	Greetings, The only input I would like to give regarding the park developments would be more ski trail grooming			x	Trail activities to be considered by the Trails and Greenways Committee. Feedback will be shared with Committee
Keep Chadburn a Park	This is the first time I've heard that Chadburn Lake is a park and am very concerned that "management" means "Development". I love this natural area because it is quiet and peaceful and mostly absent of structures and signs. PLEASE do not destroy that!	x			Chadburn Lake Park was designated as such in the 2010 OCP. Park values and have identified and guided by the Regional Parks Plan which limits development to enhance or maintain park values
No motorized equipment		x	x		The Trail Plan allows or limited motorized forms of recreation
No permit cutting trees				x	Yukon Government manages tree-cutting permits within the City area; no permits will be given for park area. City may cut trees within park for maintenance reasons
No oil and gas permit exploration				x	Outside the scope of City as per Municipal Act. Yukon Government permits exploration activities
Campfires	Plan needs to recognize that people want campfires, so in order to control and contain them the City should provide legal firepits at specific locations	x			Plan includes initiative to improve day-use areas at Schwatka, Chadburn Hidden and Long Lake
Limit new activities during planning process	No new activity should be permitted within the Park, even as a pilot project, until the management			x	Not specified as part of this planning process; Trails and Greenways Committee guides new uses as per Trails Plan and all available park-related plans and processes
Improve trail communication	Update and provide to the public a map of existing park trails, trail designations, and environment	x			Plan outlines some tangible steps to improve communication
Improve trail communication	Inform the public about current trail designations and trail maintenance	x			Plan outlines some tangible steps to improve communication
Improve bylaws	Rectify bylaw and trail use inconsistencies		x		No plans to review or amend bylaws at this time
Involve people	Communicate with, and directly involve, citizens throughout the park management plan	x			The Chadburn Park planning process abides by the International Association for Public Participation and its Core Values
Beach at Chadburn Lake	For the Chadburn Lake plan, I think you should put more beach area near the boat launch/dock area. Just clear some about 40feet of brush and dump sand down. Whitehorse needs more dedicated beach	x			Plan includes initiative to improve Chadburn Lake day use area including an expanded beach area
Protect wetlands	In particular, we agree that all wetland habitats should be included within ESA 1. We suggest that these areas be managed in a manner that minimizes negative impacts. This would include not routing new trail development within these areas and consideration of rerouting existing trails around these areas. We acknowledge that this is not always an option and therefore encourage where trails, either currently or in the future, cross ESA 1 areas, particularly wetlands, that adequate measures are taken to minimize development impacts such as using bridges or boardwalks as part of the trail system	x			As per OCP and Regional Parks Plan
Zoning	According to the Official Community Plan, Chadburn Lake Park is currently zoned as greenspace. Given the options under the zoning bylaw this designation is likely the most appropriate however zoning is open for amendment at any time if a proposal is put forward. Our organization would like to see some form of designation that is more permanent than what is currently in the zoning bylaw if possible.			x	Similar comments received during Regional Parks Plan process; to be considered during next OCP process
High orienteering value	Chadburn Park has been and will continue to be extremely valuable as an orienteering area due to its complex topography; relatively undisturbed/undeveloped character and proximity to downtown Whitehorse. As documented recently by plan consultants, the park area has been used several times for western and Canadian Orienteering Championships. In addition, YOA hosted 90 Swedish orienteers at long Lake at a special competition during their north American tour. They were especially impressed at the complexity of the area detail	x			As per Regional Parks Plan, Chadburn Lake Park includes recreational values such as orienteering
Beach at Chadburn Lake	This marks the third time over a fifty year period, that I have made this proposal to develop a sandy beach at Chadburn Lake.	x			Plan includes initiative to improve Chadburn Lake day use area including an expanded beach area
