

Don't SINK Your Grease!

Keep these
out of our
City's
sewers:

GRAVIES

MEAT
FATS

OILS

DRESSINGS

SAUCES

SOUPS

Instead:

- ✓ Use screens over drains.
- ✓ Wipe grease and food scraps out of dishes and pots and put into compost.
- ✓ Pour grease and oil into containers and dispose of in your waste once cooled.
- ✓ Don't use emulsifiers, chemicals, hot water, or other agents to dissolve grease. They wear off in the sewer system and still make a greasy mess.
- ✓ Clean and maintain the grease trap often.

Grease congeals and sticks in the sewer system causing back ups and flooding.

ICK!
