Subject: Zoning amendment 2025-19 (Lot 1175 Quad 105D/14 - 92340 Alaska Highway). File# Z-18-2024.
Date: Sunday, March 30, 2025 11:32:46 AM

I do not have an objection to the rezoning of the lot as presented in the notification letter dated March 11, 2025. However, when the occupier of the land clears the vegetation on the lot they must either do this outside the main breeding bird season (May 3 to August 15) or have an experienced avian professional check for occupied nests. If the latter, then the land occupier must work with the avian professional to set up appropriate setbacks around the nests until the nests are no longer considered to be occupied (defined as containing a live bird or viable egg under the *Migratory Bird Convention Act*).

Thank you.
