AMENDMENT NOTICE

Revised content related to the requirement for installation of a meter chamber to support private development.

Date: April 30, 2025

File: 2025_AN_SSM_014

General

This notice is intended to inform stakeholders of a change to application of the City's Standard Detail A4.8 related to water meter chambers containing both supply and return water mains.

This change also applies to content of Section 7.1.9 of the City's Engineering Guidelines for Complex Development.

Starting April 30th, 2025, until further notice, the City will not require proposed private development to include installation of meter chambers containing both supply and return mains to meter private water networks.

Metering requirements will be reviewed as part of the Development Permit application process based on specifics of proposed development. In general, water meters will be located within buildings or within meter chambers containing only a supply main or return main.

Application of Detail A4.8

Installation of meter chambers in accordance with this Standard Detail will not be required or supported until further notice.

Application of Section 7.1.9 – Engineering Guidelines for Complex Development

Meter chambers will not be required for **all** private development with servicing design that includes a private water network.

Should you require further information regarding these requirements please contact Engineering Services at (867) 668-8305.
